Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the claimed combination of a substrate for an ink jet head is not found in the prior art.

For example, the inclusion of the claimed combination in the independent claims is the primary reasons for allowance: wherein a wiring width between the connection pad and the protective element is wider than that between the protective element and the substrate temperature sensing element;

wherein the protective element is provided for a logic circuit unit composing the driving circuit, and a size of the protective element connected to the substrate temperature sensing element is equal to that of the protective element connected to the logic circuit unit; wherein the substrate temperature sensing element includes a diode sensor;

A member for forming a liquid channel jointed to the substrate for an ink jet head and associated with the heater and also forming a discharge port which belongs to one end of the liquid channel.

The examiner has conducted an exhaustive search which has resulted in the finding of no art to disprove novelty and nonobviousness.

The independent claims are deemed to be allowed. The dependent claims are allowed since they depend from allowed base claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
